Perf	ormance	and Evalu	ation Measures	s (Focus Area 1)	
with	the purpo	se of the pr	ogram. Include th	ied for this program which are related to student outcomes and are consistent ne tools used to measure performance, as well as the processes that will be used tives and strategies.	
Perf	erformance and Evaluation Measures (Focus Area 2)				

Describe the performance measures identified for this program which are related to student outcomes and are consistent with the purpose of the program. Include the tools used to measure performance, as well as the processes that will be used to ensure the effectiveness of project objectives and strategies.

To ensure that the proposed summer work-based learning program leads to measurable, meaningful improvements in student outcomes, we will use a combination of quantitative metrics and qualitative feedback tools. These measures are aligned with both the purpose of the Summer Career and Technical Education Grant and our local CTE program goals.

Key Student Outcome Measures Outcome	Performance Indicator	Target
Increased Participation	Number of students enrolled in summer work-based learning	16
Skill Development	% of students demonstrating growth in employability and technical skills (via rubric or employer feedback)	90%
Credential Attainment	% of students earning an industry-recognized certification aligned to their CTE Program of Study	75%
Postsecondary Transition	% of program completers enrolling in postsecondary education, training, or employment within 6 months	75%
Employer Engagement	Number of employer partners hosting students and/or participating in mentorship	10 employers

Tools and Instruments for Measuring Performance

Worksite Evaluation Rubrics: Employers will complete structured evaluations of each student, rating employability and technical skills using standardized rubrics. Student Reflection Surveys: Students will submit pre- and post-program self-assessments to measure changes in confidence, skills, and career clarity. Certification Reports: Program coordinators will collect data on earned credentials and certifications through testing centerers and instructor verification. Participation and Demographic Logs: Maintained by program staff to ensure equity of access and track student engagement by subgroup. Follow-Up Surveys: Conducted 3–6 months after program completion to gather postsecondary placement and employment data.

Evaluation Process to Ensure Program Effectiveness

Baseline and Post-Experience Comparisons: Students will complete pre- and post-program surveys to assess growth in technical knowledge, career awareness, and soft skills.

Employer and Mentor Feedback: Partner employers will complete evaluations and participate in debrief interviews to assess program quality and student preparedness. Regular Progress Monitoring: Weekly check-ins between students, site supervisors, and program coordinators will identify and address any issues in real time.

Program Debrief and Data Review: After the summer program ends, staff will analyze data across all performance measures to evaluate goal attainment, identify trends, and inform program refinement.

Reporting and Accountability: Outcomes will be reported to grant funders, school administrators, and advisory committees to support transparency, sustainability, and continuous improvement.
