The instructional leadership package will provide training, implementation support, and one-on-one coaching to campus and district leaders to build their own capacity and that of the educators that they manage. Approved providers include all 20 education service centers as well as vetted vendors with a history of strong results working with campuses and districts in Texas. This package consists of a required suite of trainings and support intended to foster continuous improvement by helping campus and district administrators grow concrete instructional leadership skills in the areas of schoolwide culture routines, HQIM internalization and implementation, observation and feedback, and data-driven instruction.

This is a two-year grant:

- The Blended Learning Grant opportunity has two distinct cohorts and associated purposes that applicants will select from, as described below:
- The Blended Learning Planning cohort will support school districts and open-enrollment charter schools through a planning stage to design and subsequently implement a high-

- quality blended learning model in math (through Math Innovation Zones - MIZ) and Reading Language Arts (RLA) aligned with a High-Quality Instructional Material curriculum (HQIM).
- The Blended Learning Strategic Operations cohort will support school districts and open-enrollment charter schools in leveraging a blended learning model to make a strategic operational shift to scheduling, staffing and/or budgets. This shift will seek to make robust operational changes to optimize campus staffing models for teachers while maximizing academic impact for students. The grant is available to LEAs that have successfully completed a planning phase of either Math Innovation Zones or RLA Blended Learning grants. Applicants will select from either 1. Rotation Model, 2. Flex Model, or 3. District Proposed Model. Note that all models will require significant operational and staffing shifts to rethink time in a teacher-centric way at the participating campus(es).

Program Description

The APCSP grant is offered to assist each school district in the state in making an Advanced Placement Computer Science Principles course available at each high school in the district and to support students in their exploration of computer science related professions. The objectives for the grant are to increase participation and performance of students taking and passing the AP Computer Science Principles (APCSP) course and scoring a 3 or higher on the exam, increase the number of special population and non-traditional students enrolled in an APCSP course, increase the number of CTE completers taking an AP course, and increase the number of students meeting College, Career, and Military Readiness (CCMR) outcomes. The APCSP grant opportunity allows grantees to achieve these goals by providing funds for staffing, training, supplies, materials, travel, technology and equipment to plan, implement and sustain an APCSP course.

Q1.

Program Description:

School Actions are whole-school strategies districts use to increase access to high-quality schools, meet community needs, and address chronic underperformance. By providing technical assistance and grant funds to support school actions for individual campuses, TEA also supports school districts to take strategic actions that both improve schools and provide communities, parents, and families with the schools and programs they want, need, and deserve. All School Action Fund (SAF) grantees must plan and implement ESF-aligned academic and educational models, strategic scheduling (such as ADSY, extended day/year, and/or blended learning programs that require operational and staffing shifts to rethink and maximize time and flexibility), have an empowered campus leader with a track record of success, and adopt and implement high quality instructional materials (HQIM) and research-based instructional strategies (RBIS) at the school action campus by the first year of implementation.

SAF ADSY Full Year

SAF Additional Days School Year adds half-day formula funding for school systems that add instructional days to any of their elementary schools ([Texas Education Code \(TEC\), §48.0051](#)). Districts will generate half-day funding for each instructional day after their 180th instructional day up to their 210th instructional day. ADSY funding is available at the campus level and programs can utilize anywhere from one to 30 additional days with design flexibility as long as it meets eligibility requirements. For purposes of the 2025-2026 School Action Fund-Planning and Implementation grant, grantees must add 25-30 days to their 180-day calendars and make daily master schedule changes to improve student and staff sustainability through additional brain breaks and teacher planning time.
